

Capability Statement

Data Stream Networks Pty Ltd
Building Networks That Connect Communities

Data Stream Networks specializes in delivering NBN compliant comprehensive telecommunication solutions for businesses of all sizes. We design, build, and deploy advanced network infrastructure. Our expertise includes end-to-end installation of fibre and coaxial equipment, professional fibre splicing, and seamless connectivity from the network core to customer premises. We also provide full business deployment services, network assurance, maintenance, and performance optimization to ensure reliable, high-quality operational performance.

About Us

Our Vision

To build and maintain world-class telecommunication networks that keep Australia connected, resilient, and ready for the future.
